

# EMPLOYEE SUCCESS STORY

**Maral Afsarpour**  
Senior Hybrid Assembler

Meet Maral Afsarpour, our dedicated Senior Hybrid Assembler at Quantic Microwave Dynamics in Irvine, California, with seven years of service. In her role, Maral oversees device assembly, testing, and plasma cleaning, while also training and inspecting new assemblers. She excels in setting up bonding machines, performing wedge wire/ribbon bonding (Aluminum, Gold), and conducting bond pull tests to ensure product reliability. Maral's adaptability and mentorship have fueled her growth from limited electronics industry knowledge to a crucial role within our company. She particularly enjoys contributing to flight unit projects for space and mission-critical applications. Beyond her core responsibilities, Maral plays an important role in inspecting assemblies and contributes to process improvement by redesigning drawings. Her multifaceted skills and attention to detail contribute significantly to maintaining high-quality standards. Outside of work, Maral showcases her creativity in macrophotography, reflecting her commitment to personal growth. Her career journey from graphic design to electronics manufacturing embodies our values of growth, adaptability, and dedication. We are proud to have Maral on our team and we look forward to her continued success!

*"I joined Quantic Microwave Dynamics with little electronics industry knowledge, but with determination and support, I've grown into my role. Every challenge is an opportunity to learn and excel, and I'm proud to be part of a team that fosters growth and innovation."*
